

Locksmith Course Brochure

Five Practical Workshop Tracks

A hands-on look at how MyLock trains new and working locksmiths in the Klang Valley — from foundational lock mechanisms to automotive smart-key programming and ECU bench work. This brochure covers every track, the operating income bands, and how the dispatch pathway works.

Reviewed by Vince Tan, Deputy President GPPKM 2025-2027 · Last updated 27 September 2026

The Five Workshop Tracks

Each track is a focused, practical workshop. Start at the foundational level, or — if you already work in the trade — go straight into the automotive, ECU or advanced specialisations. Income figures are target operating bands across MyLock's active technician network, *not guaranteed earnings* (full disclosure on page 3).

Entry-Level Locksmith

Lock mechanisms, key cutting and basic troubleshooting. The starting point for newcomers to the trade. **2 days.**

RM 4,000–7,000 / mo

Smart Lock Installation

Installation, drilling, wiring, configuration and troubleshooting across Yale, Igloohome, Samsung, Kaadas and Philips smart locks. **1 day.**

RM 4,000–12,000 / mo

Automotive Locksmith

All-Keys-Lost (AKL), key cloning, transponder/chip handling, EEPROM read/write, OBD programming and safe unlocking. Tooling: Xhorse VVDI, Autel, Lonsdor. **4 days.**

RM 6,000–9,000 / mo

ECU Specialist

Immobiliser syncing, ECU bench work, MCU/chip desoldering, EEPROM read, data recovery, BDM/JTAG, coding and calibration. Needs foundational automotive experience — not a beginner track. **8–9 days.**

RM 6,000–12,000 / mo

Advanced Locksmith

Anti-pick systems, restricted keyways, safebox mechanics, drilling methodology and high-security bypass for established locksmiths moving into commercial and industrial work. **3 days.**

RM 6,000–15,000 / mo

WHAT YOU CAN EARN

Operating Income Bands by Track

Track	Workshop length	Target operating band
Entry-Level Locksmith	2 days	RM 4,000–7,000 / mo
Smart Lock Installation	1 day	RM 4,000–12,000 / mo
Automotive Locksmith	4 days	RM 6,000–9,000 / mo
ECU Specialist	8–9 days	RM 6,000–12,000 / mo
Advanced Locksmith	3 days	RM 6,000–15,000 / mo

Upper bound (RM 12,000–15,000/mo) reflects a high-end specialist — typically an ECU Specialist or Advanced Locksmith with extended-hours availability. These are target operating bands, not guaranteed earnings. Workshop fees, intake schedule and tool requirements are shared on WhatsApp before you commit — every track has different tool needs.

FROM WORKSHOP TO DISPATCH

How the MyLock Training Pathway Works

Workshops build the skill; the MyLock dispatch pathway is how graduates earn the chance to receive paid jobs through the platform.

1

Pick a Track

Choose the workshop that matches your level and goals — an advisor helps you decide.

2

Hands-On Workshop

Practical, tools-in-hand sessions in the Klang Valley with real locks, keys and vehicles.

3

Tool & Setup Guidance

We walk through the starter kit and tooling each specialisation needs before you invest.

4

Dispatch-Pathway Prep

Onboarding into MyLock's documented dispatch pathway, including a supervised first-10-jobs assessment. Entry is subject to your trainer's approval, ensuring platform service quality.

Dispatch eligibility is earned through the documented pathway and supervised assessment, and is subject to trainer approval to ensure platform service quality — income, job volume and certification outcomes are not guaranteed.

NEXT CONFIRMED INTAKE

Smart Key Repair & Programming — Sunday, 1 November 2026

One-day hands-on class at INNSiDE by Meliá Kuala Lumpur Cheras, 9:00 am – 7:30 pm. **RM950 per person**, including an RM180 electronic test instrument you keep. Taught in Mandarin Chinese. Co-organised with Flipkey Locksmith; runs inside Car Key Tech Day 2026, a free brand showcase the same day.

Agenda: mylock.my/courses/car-key-programming-course-malaysia · Other tracks: fees and intake dates come from a course advisor.

Frequently Asked Questions

Do I need experience to start?

No. The Entry-Level Locksmith track is built for newcomers. The ECU Specialist track does require foundational automotive experience, so it isn't a beginner course.

How much do the workshops cost?

Fees vary by track and tool requirements, so we share the full outline, intake schedule and costs on WhatsApp before you commit.

Will I be guaranteed jobs or income after the workshop?

No. The figures here are target operating bands observed across MyLock's technician network, not guaranteed earnings. Graduates earn dispatch eligibility through the documented pathway, including a supervised first-10-jobs assessment.

Is MyLock an accredited college or academy?

MyLock provides trade-skill workshops and dispatch-pathway preparation. It is not a registered Private Educational Institution and the workshops are not MOE-, SKM/JPK-accredited, or HRD Corp claimable unless a specific intake notice states otherwise.

Where are the workshops held?

In the Klang Valley (Selangor / Kuala Lumpur). Exact venue and intake dates are confirmed with your advisor when you register.

What Happens Next

1

Message a course advisor on WhatsApp (scan or tap).

2

Get the fee sheet and next intake date for your track.

3

A deposit confirms your seat and dates.

4

Attend the hands-on workshop, then the dispatch-pathway briefing.

Income disclosure: Income figures cited (RM 4,000–15,000/month operating band) reflect observations across MyLock's active technician network plus Malaysia trade-catalogue benchmarks for each specialisation. These figures represent target operating bands, NOT guaranteed earnings, and NOT graduate-cohort outcome data — MyLock has not yet collected post-graduation earnings data across enough cohorts and 12+ month observation windows to publish graduate-specific outcomes.

Current delivery status: MyLock currently provides trade-skill workshops, intake coordination and dispatch-pathway preparation. MyLock is not currently registered as a Private Educational Institution under the Education Act 1996. MyLock is not MOE-accredited, not SKM/JPK-accredited, and workshops are not HRD Corp claimable unless expressly stated on a specific intake notice. Income, job volume and certification outcomes are not guaranteed.

Trademarks: Xhorse, Autel, Lonsdor and OBDSTAR (tools) and Yale, Igloohome, Samsung, Kaadas and Philips (locks) are trademarks of their respective owners, referenced nominatively for training context. MyLock is not affiliated with any specific tool or lock manufacturer.

Operated by **Inpixel Marketing** (SSM 202003100521). GPPKM registration PPM-007-10-17042016.
